SOUTH WEST RESIDENTS SAY NO TO A BADGER CULL!

We, the undersigned residents of the South West, strongly oppose the Government's proposal to conduct a pilot cull of badgers in our region. Culling has already been shown to make "no meaningful contribution to the control of TB in cattle in the UK", and the Government's own key advisor Lord Krebs has stated publicly that a cull "would be a mistake".

We call on DEFRA to abandon this cruel and senseless slaughter of our wildlife and to invest instead in a badger vaccination programme, which is widely agreed by experts to be the best way forward.
